Portfolio

Profile

Full-Stack Software Engineer specialized in Flutter, AI-powered systems, and scalable mobile/web applications with experience in enterprise platforms, HR systems, and real-time collaboration solutions.

Professional Experience

Freelance Mobile Developer — UK Drilling Tunisia

Mar 2026 – May 2026

Flutter Developer & Technical Translator

Tunisia

- Developed a mobile application for managing drilling projects, internal operations, and team coordination.
- Designed features for project tracking, task management, and communication workflows to improve operational efficiency.
- Provided Turkish-Arabic-English translation support during technical meetings and daily coordination with international teams.

Freelance Flutter Developer — Erudaxis

Jan 2026 – Feb 2026

Flutter Mobile Developer

Ariana, Tunisia

- Developed the APK/mobile version of the company's educational platform using Flutter and Provider state management.
- Improved application responsiveness, scalability, and user experience while collaborating with the development team.
- Contributed to the digitalization of educational services by making the platform more accessible on mobile devices.

Orange Tunisia — Final Year Project (App Salary Maxit)

Mar 2025 – Aug 2025

Mobile Application Developer

Tunisia

- Developed HR management features including employee services, leave requests, push notifications, and real-time updates.
- Built an AI-powered meeting assistant capable of generating live captions and automatic meeting summaries in real time.
- Integrated live-stream meeting functionality and developed a 3D virtual workspace environment using Unity to improve collaboration.
- Worked closely with HR and IT teams to deliver secure, scalable, and business-oriented solutions.

Education

ESPRIT School of Engineering and Technology

2020 – 2025

National Engineering Degree in Computer Science

Tunisia

Projects

AI Workplace Platform — Flutter, Unity, AI/NLP, Node.js

2025

Developed a full-stack HR platform with AI summarization, live-stream integration, push notifications, and 3D collaboration features.

Strapi Auto-Diagram Feature — Strapi, Koa.js, GitHub API

2024

Built a feature generating UML diagrams and CRUD operations automatically with GitHub integration.
